SUMMARY

Full-stack engineer with hands-on experience shipping frontend features on a live production codebase and independently designing, building, and deploying complete backend services and REST APIs. Comfortable owning a problem end-to-end – evaluating tradeoffs, making implementation judgment calls, and iterating fast with attention to detail. Actively strengthening core DSA fundamentals alongside three self-deployed full-stack projects.

EDUCATION

VIT Bhopal University,

Bachelor of Technology in Computer Science (AI & ML)

Bhopal, India

2024–2028

TECHNICAL SKILLS

Languages: Java, C++, Python, JavaScript (ES6+), HTML5, CSS3, PHP, SQL

Concepts: Object-Oriented Design, Data Structures & Algorithms, System Design Fundamentals, SDLC, Agile Development, Debugging, REST API Design, Client-Server Architecture

Backend & APIs: Node.js, Express.js, REST API Design, PHP

Databases: MySQL, Supabase, Neon (PostgreSQL), Database Schema Design

Frontend: React.js, Tailwind CSS, DOM Manipulation, Canvas API, Web Performance & Accessibility

Tools & DevOps: Git, GitHub, Vercel, Railway, CI/CD basics, Chrome Extension APIs

DSA & Problem Solving: Java – actively solving problems via the A2Z DSA roadmap (GitHub)

PROJECTS

AI Career Decision Engine

Live Demo | GitHub

React, Node.js, Express, REST APIs, Vercel, Railway

- Architected a decoupled full-stack platform with an independently deployed React frontend (Vercel) and Express/Node.js backend (Railway), enabling independent scaling and deployment of each layer.
- Engineered REST API endpoints for PDF parsing and structured data extraction, powering resume analysis and skill-gap identification across 15+ technical roles.
- Integrated a third-party AI API into the backend service layer to generate recommendations from parsed, structured user data.

NoteLift – Chrome Extension

Chrome Web Store | GitHub

JavaScript, Chrome Storage API, Chrome Extension APIs

- Built and published a text-to-note Chrome extension with 300+ installs and 14 active users, architected around a fully local, privacy-first storage layer with zero backend dependency.
- Delivered a capture-to-save flow for sub-second note creation from any webpage, handling storage sync and UI state entirely client-side.

Brainstormzz

Live Demo | GitHub

React, Canvas API, JavaScript

- Developed an interactive brainstorming canvas application with draggable, connectable nodes and real-time state management using the Canvas API.
- Established a dual-provider fallback architecture – an on-device engine as primary with a cloud API as backup – to keep the application responsive and available under varying runtime conditions.

Personal Portfolio (rohitdubey.dev) – React site showcasing projects and experience; 180+ active users and 1,700+ tracked interactions since launch (Google Analytics).

EXPERIENCE

Frontend Web Development Intern – AKS (Remote),

May 2026 – Present

React, JavaScript, Node.js

- Contribute to code reviews and resolve UI/component-level defects surfaced during review, improving reliability and long-term maintainability of a live production codebase.
- Collaborate fully remotely with a cross-functional engineering team through agile ceremonies and async design discussions, translating product requirements into working, tested React components.
- Debug and resolve software defects across frontend components as part of a live, Vercel-deployed production release cycle.

Freelance Full-Stack Web Developer – DevInterio (devinterio.com),

2026

HTML, CSS, JavaScript, PHP, MySQL

- Scoped and deployed a 35-page business website end-to-end – now driving 225+ active users and 1,200+ tracked interactions (last 90 days, Google Analytics) – including a custom PHP/MySQL backend and admin panel, for an interior design client.
- Created backend admin tooling for blog publishing, video management, and gallery control, replacing manual content updates with client-operated self-service workflows.
- Owned the full post-launch support cycle independently: diagnosed and resolved live server configuration and routing issues (.htaccess, caching) with zero external support.

CERTIFICATIONS

Oracle Certified Foundations Associate: Java – Oracle University

June 2026

Cloud Computing – NPTEL Elite, IIT Kharagpur

April 2026

Applied Machine Learning in Python – University of Michigan, Coursera

December 2025
